

## IN THE CLAIMS

1 (Original). A cellular telephone comprising:  
a housing;  
a processor in said housing;  
a compartment in said housing; and  
a sliding coupling in said compartment to slidingly receive a removable module  
and to couple the module to the processor.

2 (Original). The telephone of claim 1 including a removable module.

A 3 (Original). The telephone of claim 2 wherein said module includes a display.

4 (Original). The telephone of claim 2 wherein said module includes a processor.

5 (Original). The telephone of claim 2 wherein said module includes additional  
memory.

6 (Original). The telephone of claim 2 wherein said module includes an Ethernet  
adapter.

7 (Original). The telephone of claim 2 wherein said processor is a baseband processor  
and said module includes an applications processor.

8 (Original). The telephone of claim 1 wherein said housing includes a front face  
having a keyboard, said compartment opening in said front face to receive said module.

9 (Original). The telephone of claim 1 wherein said housing houses a battery and said  
compartment is accessible beneath said battery.

10 (Original). The telephone of claim 1 wherein said housing includes a front face including a keyboard, a rear face, and opposed ends, one of said ends including a slot to access the compartment in said housing.

11 (Original). A method comprising:  
providing a cellular telephone including a compartment to receive replaceable modules; and  
providing a plurality of replaceable modules having different capabilities that may be slid into the compartment of said cellular telephone to upgrade said cellular telephone.

12 (Original). The method of claim 11 including providing a module that includes a display.

A 13 (Original). The method of claim 11 including providing a module that includes a processor.

14 (Original). The method of claim 11 including providing a module that includes additional memory.

15 (Original). The method of claim 11 including providing a module with an Ethernet adapter.

16 (Original). The method of claim 11 including providing a module that includes an applications processor.

17 (Original). The method of claim 11 including providing an opening in the front face of said telephone to receive said module.

18 (Original). The method of claim 11 including providing a compartment beneath the battery of the cellular telephone.

19 (Original). The method of claim 11 including providing a slot in the cellular telephone's housing to slidingly receive a module.

20 (Original). The method of claim 11 including providing a plug-in connection in the compartment for a module.

21 (Currently Amended). A cellular telephone comprising:  
a housing;  
a processor in said housing;  
a compartment formed in said housing to pluggingly receive a module within said compartment; and  
an electrical connection between said compartment and said processor.

A<sup>1</sup>  
22 (Original). The cellular telephone of claim 21 including a removable module.

23 (Original). The cellular telephone of claim 22 wherein said module includes an applications processor.

24 (Original). The cellular telephone of claim 22 wherein said module includes a display.

25 (Original). The cellular telephone of claim 22 wherein said module includes additional memory.
